That's really quite plain to be seen.
She now is so very transparent
She's even exposing her bean
In hats that are made of illusion.
For frocks of the same she is keen,
In lingerie blouses and mantles
All made of illusion she's seen.
And so in a paradox manner
Results of all chance are bereft,
Because she's so wrapped in illusion
No illusions about her are left.

NEW YORK, June 18.-Hats won't cover a multitude of sins in the hairdressing line any more. You've got to have a good "do" on your hair nowadays, because the very smartest | mode. chapeaux can easily be seen through. There are two popular forms of the There are two popular forms of the transparent hats—the one a simple straight flat brim composed of two layers of maline stretched smooth over the wire frame—the other has the brim composed of a wide floppy ruffle of the maline, double thickness, with occasional wires radiating from the crown to keep the ruffle from going altogether. While transparent crowns of the same maline are still very good, the latest effect is to have a velvet crown in the midst of the gauzey brim. The open face hats are most stunning in all black with a single yellow or pink rose as the

with a single yellow or pink rose as the only adornment, but all-white hats or delicate pinks and blues are also most fetching with sheer summer frocks and most summer frocks are all of that, let

most summer frocks are all of that, let me tell you.

Organdie For Blouses.

Organdie so thin and exquisite of weave and texture that Queen Mab herself might well be pleased to don it is the material de luxe for summer frocks and blouses. In all delicate thats, cither plain or strewn with Pompadour garlands, it is the quintessence of feminine loveliness. The all-white organdie is ideal for lingerie gowns and blouses particularly, as by a new triumph of the weavers' art it now washes in me to be wondered at.

Rather than wear woolen hosiery, my lady sinty yesterday would rather have suffered a thousand ills, but today she feature that Queen Mab herself a thousand ills, but today she flaunts them in the face of the multitude on the links, the tennis court, or at the steering wheel. Here's An Evening Gown Made Along Simple and Effective Lines

Rose Messaline and Black Velvet Arranged With Simplicity by French Designer Affords Welcome Relief From Elaborate Modes.

Sleeveless Basque of Long, Straight Lines, Trimmed With Jet is Relieved by Broad Velvet Sash Tied in Loose Knot.

HY don't more women have things like that instead of those ruffly duds they've wearing this summer?" inquired one man enthusiastically when he saw this evening gown by Lamagnere, of Paris. Indeed, its extreme simplicity would be a welcome relief to the woman who wants something different from the elaborate modes of the early summer.

Rose messaline, black velvet and a few bits of jet are the principal ingredients of the costume The black velvet basque is comfortably sieeveless and made with emphasis on long, straight lines. Broad sash ends of the velvet are tied in a loose knot at the left side of the front. Jet affords the only trimming, and even this is sparingly used in clasps over the shoulders and seven large buttons down the front of the basque. A tiny chemisette of tulle relieves the severity of the black velvet at the neck.

The skirt has no trimming whatsoever, yet the broad pleats of the rose messaline are sufficient to complete the effect of the costume. It is quite short for comfort in dancing.

Black satin slippers with narrow velvet lacings and rose-colored hore were selected to accompany this gown. For theater and dinner wear, a black straw picture hat lined with rose and trimmed with huge crushed roses may complete the costume.

Three Minute Journeys

By TEMPLE MANNING.

In the strange little island of Corsica. Never Bite Thread. famed alike for its relentless feuds and s the birthplace of Napoleon, the tray receding, leaving the upper part of eler finds many strange customs. But there is one custom that does not seem the teeth exposed, consult a dentist at once. A remedy that may help to strange, novel as it may be to him, the use of public ovens. Perhaps—the reason why a traveler relieve this condition consists of: Six drops each of oils of aniseseed and

does not feel puzzied at the use of the communal oven is because it has its reason for being, in his mind at least, in the poverty of the people. When the huts are unequipped with the very simplest conveniences of life it cannot puzzle him that an oven for baking is also continued.

The very first time I came upon a village oven in the heart of the little collection of huts that lined the winding track that served for a street. I knew what it was, even though I had never seen one before. The oven door was blackened by smoke, and soot from the chimney holes lay thick upon the

used.

A square structure of large stones, thirst at drugstore or "ice this village oven and the score of other ovens that I saw along the picturesque roads in the little hamlets, was set in the most convenient spot. The lower part was solid and the upper was the oven. A small hole in either side and at the back allowed the smoke to estable. A projecting roof of stone built over the oven served as a shelter to the baker.

When a village housewife wishes to When a village housewife wishes to cook anything she collects or buys a cook interest many times when a refreshing cool beverage is erefreshing cool beverage is one-third full of finely chopped ice, add one teaspoonful of powdered sugar, fill the glass two-thirds full of cocoa, and top with whipped cream.

Lemonage, grape juice, these are the stapped cream is needed in the home.

Lemonage, grape ju

When a village housewife wishes to cook anything she collects or buys a bundle of firewood and proceeds to the oven. Lighting her fire, she waits until it has burned itself down, and then she brushes the embers aside until the stone is clean. On these hot stones she places the bread or meat, brushing the ashes into the down and the stone is clean. The places the embers aside until the stone is clean. On these hot stones she places the bread or meat, brushing the ashes into the doorway.

While waiting for her food to cook she discusses local news and scandal with her friends.

Sometimes the village oven is not free to all; often it is the property of a private individual, who makes his living by renting it out. This much the same way our forefathers used to draw their grain to market to have it ground at the private mill into flour. In this control is not a drink.

Cucumber cup—One peeled cucumber sliced, two oranges, three lemons, one cup preserved ginger, one cup powdered sugar. Make a syrup of one cup preserved ginger, one cup powdered sugar. Make a syrup of one cup preserved ginger, one cup powdered sugar. Make a syrup of one cup preserved ginger, one cup powdered sugar. Make a syrup of one cup powdered sugar. Mak

way our forefathers used to draw their grain to market to have it ground at the private mill into flour. In this case the private owner, like the old-time mill owner, furnishes everything and makes a charge for the use of his oven of about one-tenth of the value of the food that is cooked.

Without the communal oven in Corsica, the village housewife would not know how to cook her daily meals. Certainly without it she would miss all the

ADVICE TO GIRLS By Annie Laurie

My Dear Annie Laurie: I have been going with a young man for the past year. During that time he has shown a tendency to be very jealous. Before going with him I was a very popular girl, but since he has shown his jealousy on several occasions my other boy friends have not asked to make any engagements with me Personally, I would rather go with more than one, as I am but nineteen years old, and do not feel that I am old enough to become engaged. My reason for writing to you is that I do not know just how to "break off" with the boy. He appears to think a great deal of me, and I am afraid he would take it very hard.

Why is it that most men seem to think that a girl who accepts their attentions binds herself to refuse to notice any other men? Surely it is most unjust, yet it is a common complaint that I notice in the letters of a number of girls who write

Tell the man-or write it to him if pose that you consider yourself engaged to him, and that he is behaving right in interfering when you show an interest in other men. rerhaps he hasn't thought of it from your point of view before.

You are exactly right in wishing to be friends with a received.

you don't care to say it-that you believe he misunderstands your attitude in the matter. He may sup-

be friends with a number instead of

dropping them all for this one. I also heartily approve of your feeling that nineteen is rather young for marriage. Girls are marrying much later now than in the last decade, and it is surely more sensible to wait until a comfortable home is fairly certain than to marry a youngster earning his first salary.

Dear Annie Laurie: The other evening a crowd of girls and boys went on a moonlight excursion. The boys sat with their arms around the backs of the girls' chairs nearly all of the evening. Now, Miss Laurie, do you think there was any harm in that, and should we ever allow it again?

FLORENCE.

Some people seem to think that a moonlight excursion offers them an excuse to allow things they would never think of under other circumstances. You girls were really fortunate that the boys behaved as well as they did—which isn't much of a compliment for them.

Next time you should not allow them to sit with their arms around the backs of your chairs. They may not be exactly sitting with their arms around the girls, but "the sentiment's just the same, my dear." If you could hear the way boys talk about girls that do allow such familiarity you will be glad to think that you are not one of them.

Miss Laurie will welcome letters of in-quiry on subjects of feminine interest from young women readers of this paper, and will reply to them in these columns. They should be addressed to her care, this office.

The Hanging Gardens of Babylon may have been one of the seven wonders of the ancient world, but today every home may have its hanging gardens without exciting any wonder at all. The effect of swinging verdure may be attained by the use of nothing more esthetic than baskets of wire, moss, and some flower seeds. The basket is first bedded with moss and earth. Seeds may be planted in such a way that the growth will cover the basket on the under side as well as on the top.

Among the plants that thrive best under these conditions are horseradish, which grows with a feathery effect that is delightful; various hardy vines, such as balsam and Wanderins Lew and Boeten ferms.

dy vines, such as balsam and Wandering Jew, and Boston ferns.

The basket must be hung in such a piace that the breeze will not dry it out quickly or the ferns or other moisture-loving plants will not thrive. It is also well to keep it away from the sun.
